

My name is:

I came to the Divine Prayer Center for the 4th Sat. English Healing Prayer and Holy Mass even though I am of Pentecostal denomination. I had severe shoulder pain which had been hurting me for at least one month. The doctor gave me some medication which I used to control the pain. I went to see Father to talk to him--he asked me if my shoulder was in pain--he understood that there was pain even though I did not tell him! He prayed for me for healing; then, later on my way home I discovered the shoulder was completely healed. Now, months later, I can report there is still no pain. In fact ,today as I was entering the church, I commented to my friend that my toes had been in pain--some joint pain--for the past few days. We thought maybe it was my shoes. After the service, the pain is now completely gone. I came with faith that Jesus could heal me and he did!
